

Laminated Glass Manufacturer

RHEO AI Smart Operational Platform Helps Major US Laminated Glass Manufacturer Increase Production Line Capacity And Reduce Labor Costs

- **ABSTRACT**

- ✓ A US leader in Laminated Glass manufacturing needed to increase capacity to satisfy customer demand while simultaneously reducing labor costs

- **CHALLENGES**

- ✓ The operation's team lack visibility and understanding of the process bottlenecks and constraints
- ✓ Supervisors were looking for management to provide operational improvement direction instead of seizing ownership and driving continuous improvement initiatives in their areas of responsibility
- ✓ Overtime was being used to achieve customer service commitments

- **RESULTS**

- ✓ Realized a 97% increase in daily units in the first 3 weeks of deployment
- ✓ Increased job satisfaction through employee engagement
- ✓ Supervisors have embraced the new empowerment and are using the RHEO system to identify, prioritize and implement rapid process improvements
