

Laminated Glass Manufacturer

RHEO AI Smart Operational Platform Helps Major US Laminated Glass Manufacturer Increase Production Line Capacity And Reduce Labor Costs

- **ABSTRACT**

- ✔ A US leader in Laminated Glass manufacturing needed to increase capacity to satisfy customer demand while simultaneously improving labor productivity

- **CHALLENGES**

- ✔ The operation's team lack visibility into the process bottlenecks and constraints
- ✔ Production dashboards were not in place to provide process performance and improvement insights
- ✔ Supervisors were looking to management to provide operational improvement direction instead of seizing ownership and driving continuous improvement initiatives
- ✔ Overtime was being used to achieve customer service commitments

- **RESULTS**

- ✔ Realized a 97% increase in daily units
- ✔ Increased employee job satisfaction
- ✔ Supervisors were looking to management to provide operational improvement direction instead of seizing ownership and driving continuous improvement initiatives
- ✔ Supervisors have embraced the new empowerment and are using the RHEO system to identify, prioritize, implement and sustain process improvements
