

RHEO WEARABLES

Smart Watch

With Rheo's bluetooth-enabled smart watches, supervisors can measure operator cycle times objectively and accurately as they work on different workstations across the line.

- ✓ Accurate measurements
- ✓ Objective Evaluation
- ✓ Multi-user functionality

Portable Camera

Portable-cameras enable the capture of video evidence during operator evaluation cycles. These videos can then be used for operator training.

- ✓ First-person videos
- ✓ Objective Evaluation
- ✓ Multi-user functionality

Virtual Reality (VR) Headset

- Rheo's virtual reality (VR) headsets offer a unique way to train operators in an immersive yet safe and controlled learning environment.
- Coupled with tablet devices, VR headsets can also be used to produce augmented 3D dashboards.

- ✓ Immersive Learning
- ✓ On-the-job training
- ✓ 3D Visualizations
